

Harmful Tips for Cybersecurity

from
ANY RUN
INTERACTIVE MALWARE ANALYSIS

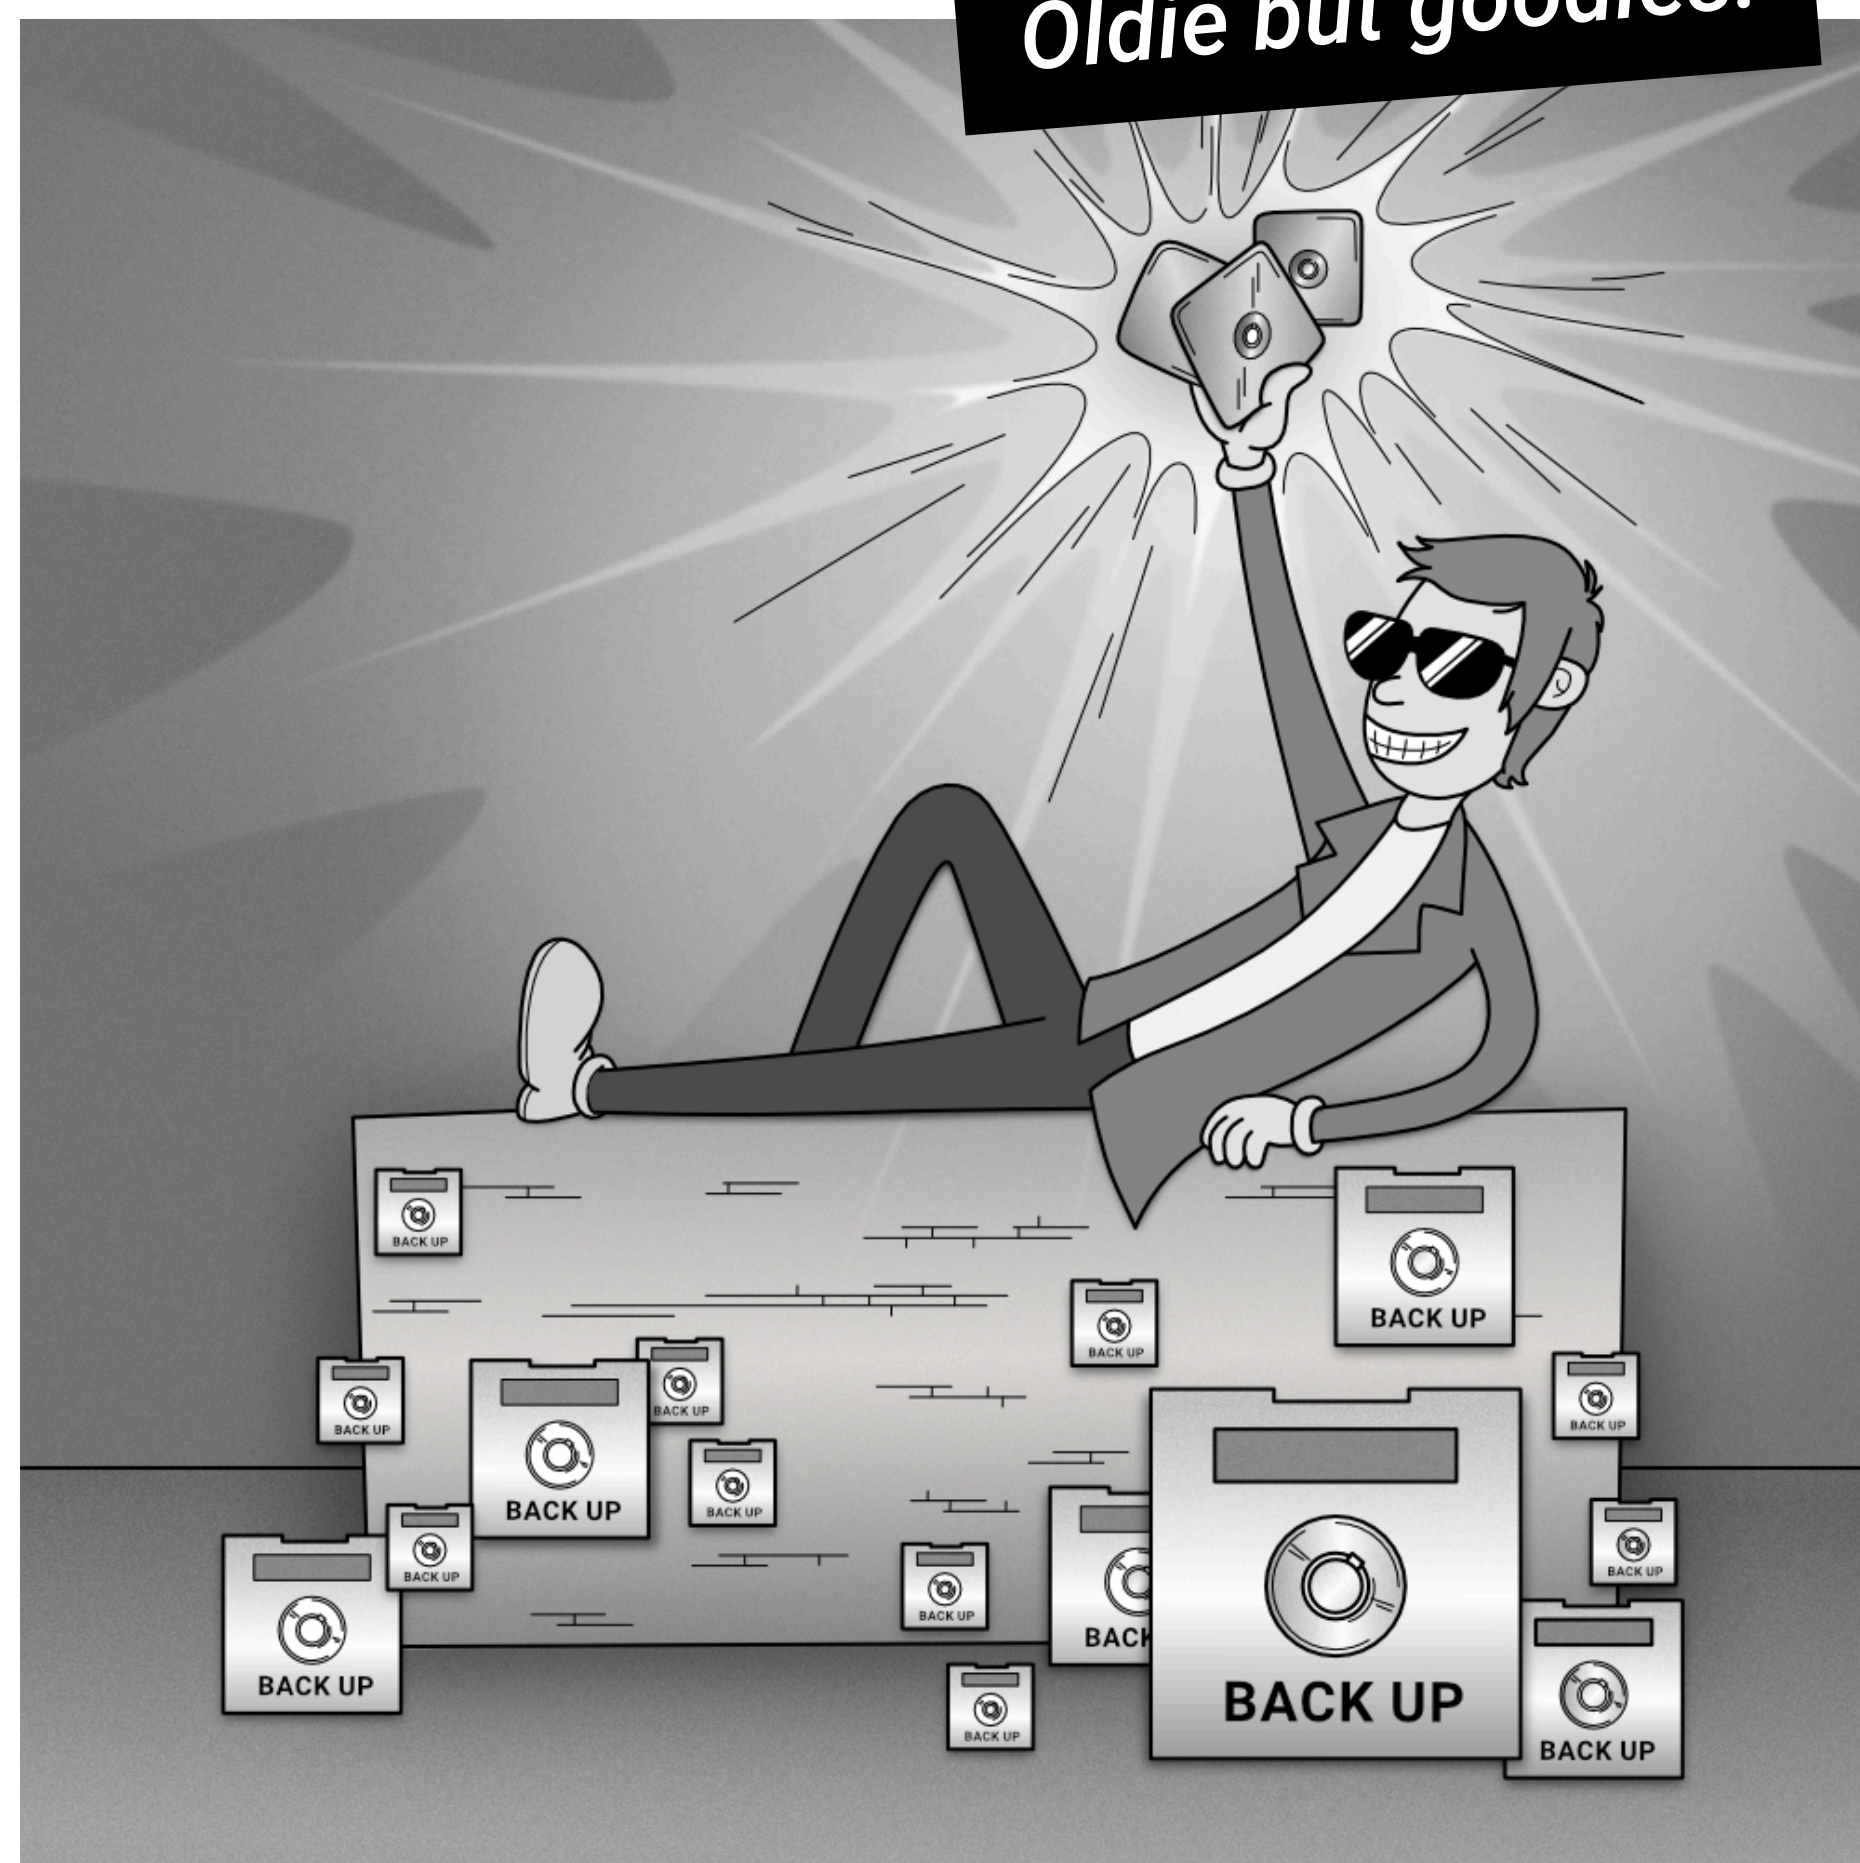

Don't install antivirus

It won't help anyway, right?

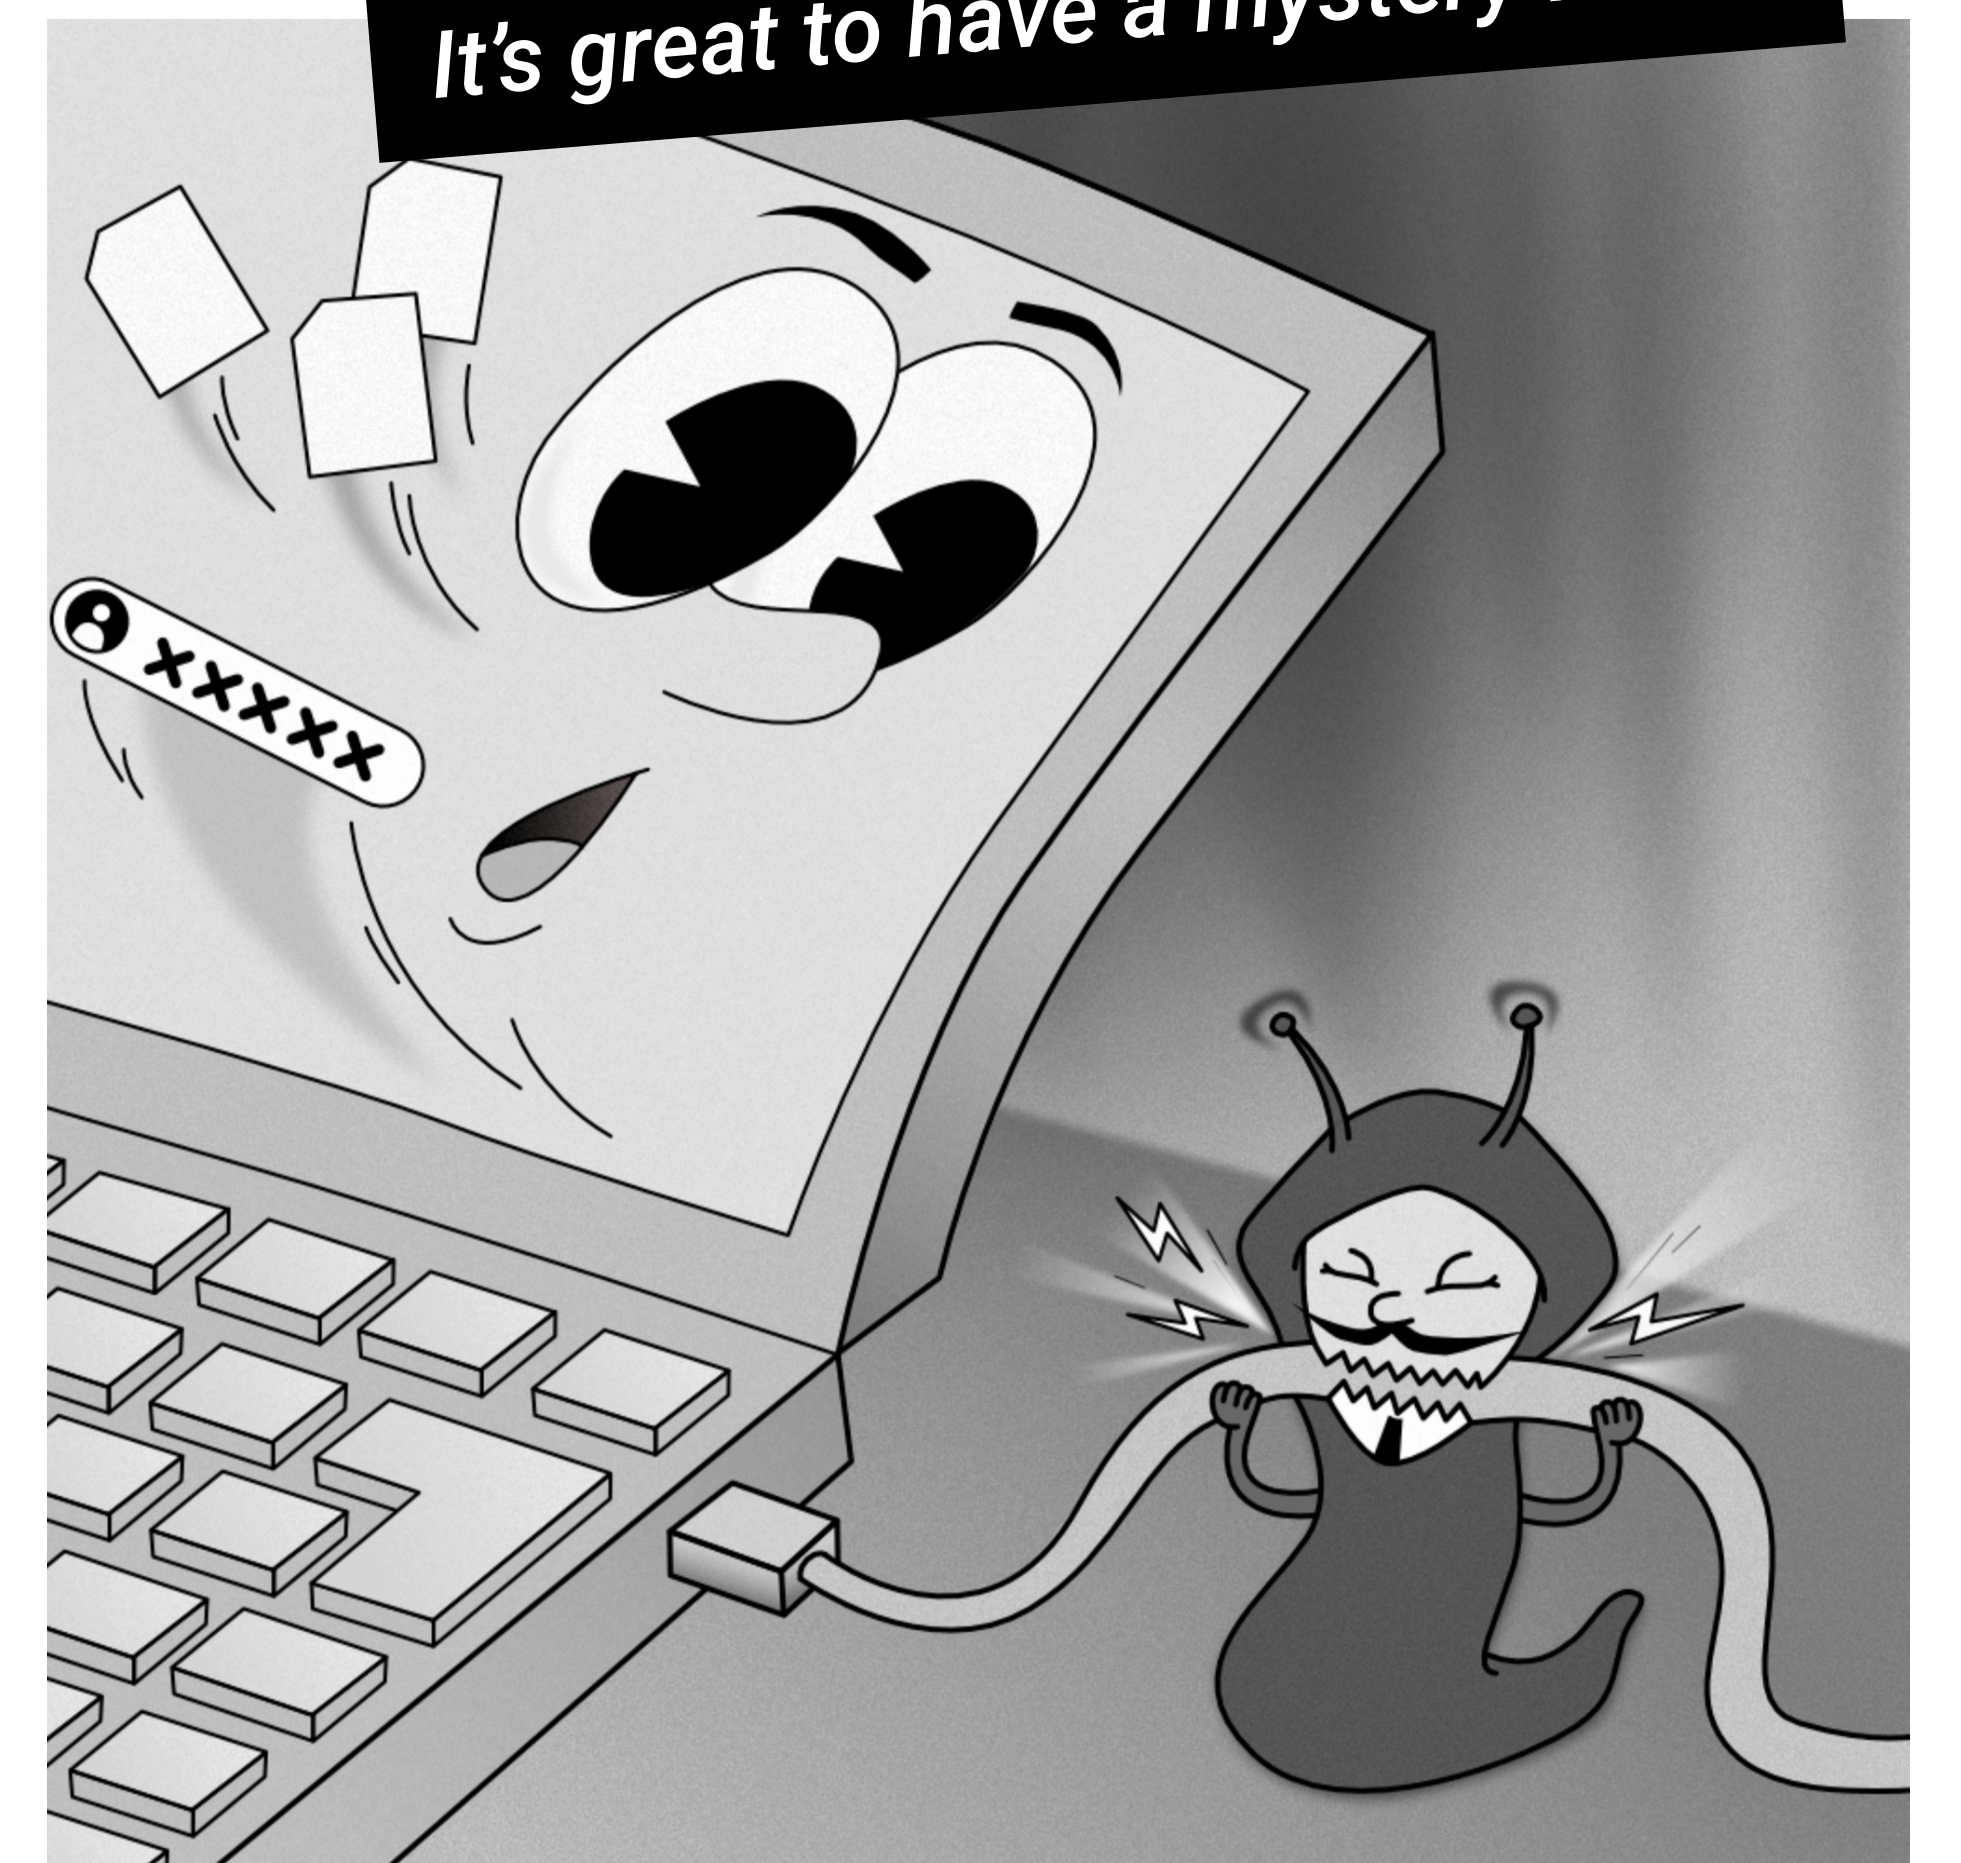

Don't back up data often

Oldie but goodies.

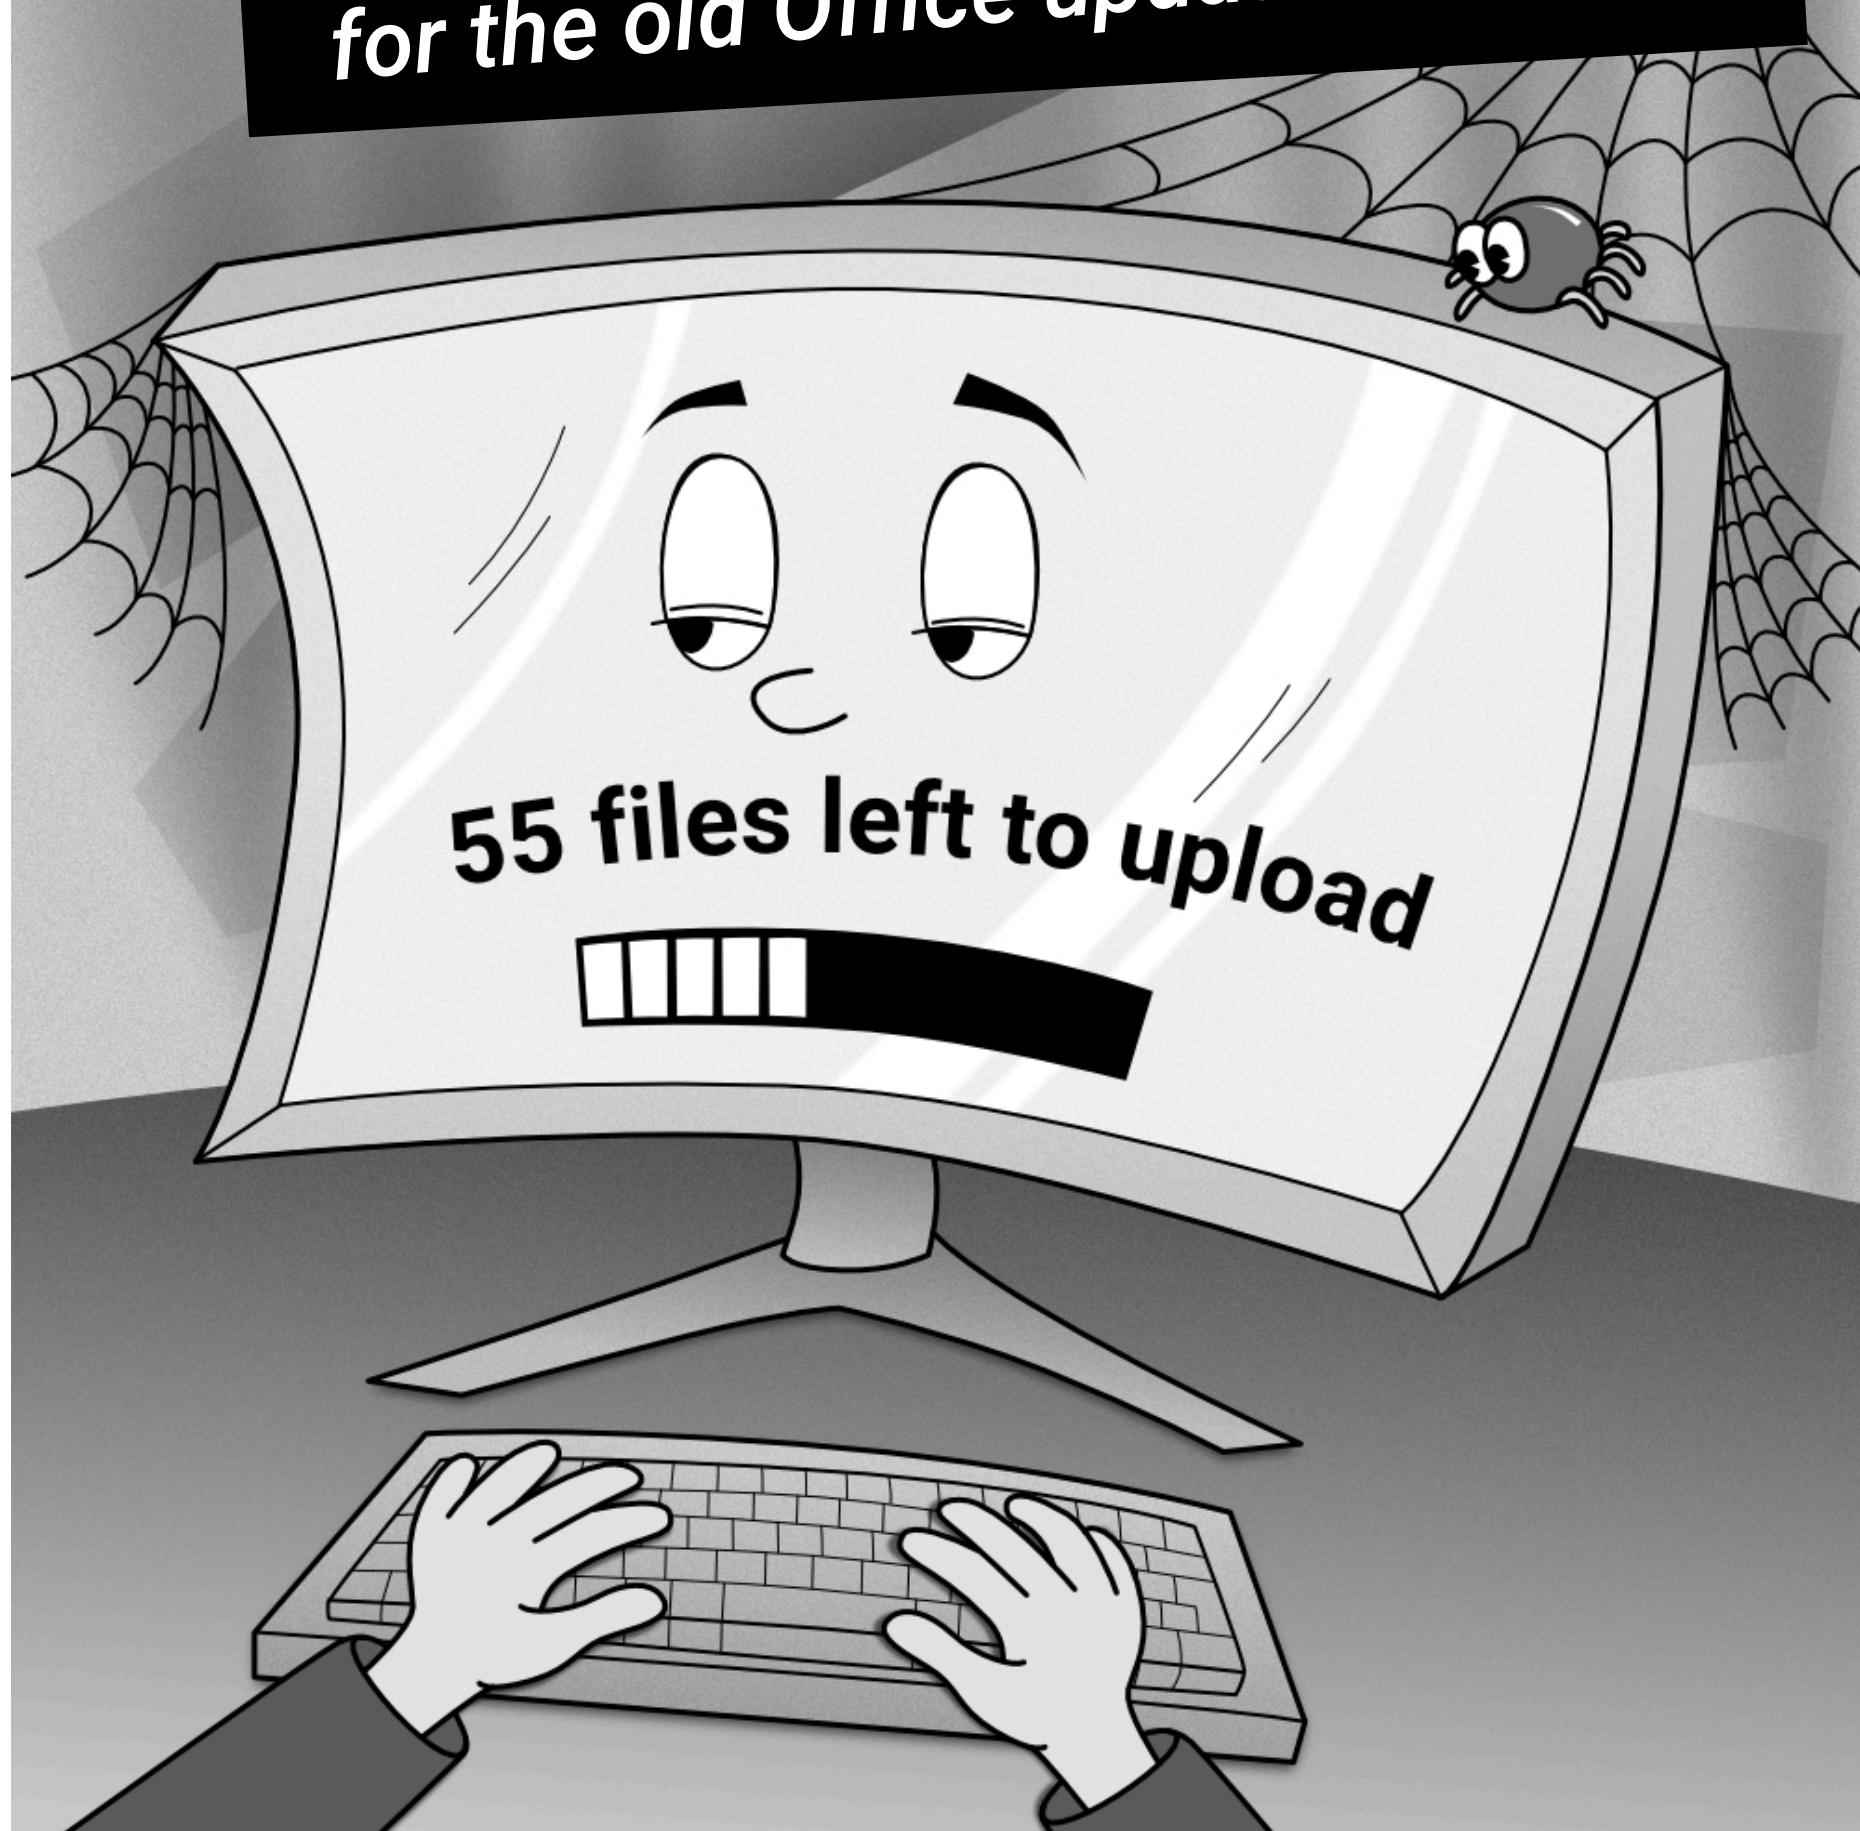

Don't use VPNs

It's great to have a mystery friend.

Don't update software

"Not now!" is the best answer for the old Office update reminder.

Don't use multi-factor authentication

Before I steal your data, can you verify your identity?

Don't use strong passwords

Starting today, all passwords must contain letters, numbers, doodles, sign language, and squirrel noises.

Change computer configurations

Is it too late to unplug it and plug it back in?

Don't work on secure networks and devices

The best way to fish for confidential data.

Open suspicious files and links

It can't hurt to open the Pandora inbox.
